

# VERTEX ARBITRAGE FUND

**VERTEX ONE**  
Asset Management Inc.

**Absolutely Alternative**

Low Volatility

Absolute Returns

Tax Efficient

## Investment Objective & Strategy

The principal investment objective is to generate consistent, positive returns, with low volatility and low correlation to equity markets. With the majority of the return in the form of capital gains the fund will be a tax efficient investment vehicle.

“Merger Arbitrage” is the predominant strategy of the fund; this involves capturing a profit from the discount between the market price and the “deal” price for a target company in an announced, legally-binding, merger situation. There are two main types of corporate mergers: cash and stock mergers. In stock mergers, the fund hedges market risk by selling short the acquiring company shares, while simultaneously buying the target company shares. In cash mergers, there is no need to hedge with the acquirer’s stock. In both situations the resulting portfolio is market-neutral.

Fund Fact Sheet

## Example of Merger Arbitrage

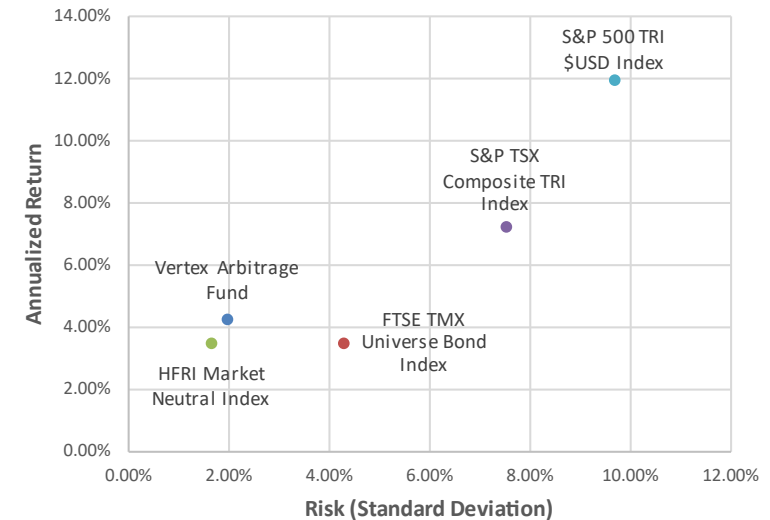

Illustrated below, is the all-cash acquisition of Precision Castparts by Berkshire Hathaway with a comparison to US stock market over the same time period. A profit was made from the closing of the spread between the market price and deal price, which occurred independent of the market's return.

## Statistical Comparison

	FUND	FTSE TMX Canada Universe Bond Index

## Periods of Market Volatility

Important information about the Fund is contained in the Offering Memorandum which should be read carefully before investing. You can obtain an offering memorandum from Vertex One Asset Management Inc. (V1). The Offering Memorandum for Vertex One investment funds does not constitute an offer or solicitation to anyone in any jurisdiction in which such an offer or solicitation is not authorized or to any person to whom it is unlawful to make such an offer or solicitation. The fund has been established with the objective of achieving "low volatility", "absolute returns" and "tax efficiency". The funds are not guaranteed; their values change frequently and past performance may not be repeated. Investors should seek independent tax counsel before investing. Returns are net of all fees, include reinvested distributions and represent Class F shares.
