Investment Objective & Strategy

The principal investment objective is to generate consistent, positive returns, with low volatility and low correlation to equity markets. With the majority of the return in the form of capital gains the fund will be a tax efficient investment vehicle.

"Merger Arbitrage" is the predominant strategy of the fund; this involves capturing a profit from the discount between the market price and the "deal" price for a target company in an announced, legally-binding, merger situation. There are two main types of corporate mergers: cash and stock mergers. In stock mergers, the fund hedges market risk by selling short the acquiring company shares, while simultaneously buying the target company shares. In cash mergers, there is no need to hedge with the acquirer's stock. In both situations the resulting portfolio is market-neutral.

Example of Merger Arbitrage

Illustrated below, is the all-cash acquisition of Precision Castparts by Berkshire Hathaway with a comparison to the S&P 500 Index over the same time period. A profit was made from the closing of the spread between the market price and deal price, which occurred independent of the market's return.

Management Team

Craig Chilton and Tom Savage are the portfolio managers of the Vertex Arbitrage Fund. Both joined Vertex One in 2010 from CIBC's highly successful, proprietary trading group. Mr. Chilton ran arbitrage strategies for 15 years at CIBC; Mr. Savage rejoined CIBC after completing an MBA at Harvard Business School, following several years on an arbitrage desk at CIBC and several years in private equity and long-only investing.

Corporate Profile

We are an independent investment firm that seeks to offer investors a different approach to fund management, one based on capital preservation in both good and bad markets. We offer investors a full spectrum of risk and return profiles, actively managed by asset class and strategy exposure. Vertex employees are collectively the largest investors across its funds.
