INTERIM MANAGEMENT DISCUSSION AND FUND PERFORMANCE

Results of Operation and Recent Developments

For the first six months of 2018, the Vertex Growth Fund Class B units returned -3.55% and the Class F units returned -3.01%.

There were a few recent developments to note during the first six months of 2018. The first, was the departure of Tim Logie as one of the Portfolio Managers on the fund. John Thiessen remains the Lead Portfolio Manager of the Fund. The second, was continued redemptions which led to a decrease in the fund's assets under management from the Annual Management Report of Fund Performance. None of these developments had an impact on the performance of the fund.

We see no material changes to the operation of the fund going forward. We continue to see the same behavior these past few years in the oil patch. With near term oil futures now trading at a 5 percent premium over the price of oil one year out, it has had a startling effect on inventory numbers. Traditionally, one could keep oil in a tanker and lock in a 5 percent gain by selling it one year later, now, you pay a penalty for keeping oil in storage, which has depleted inventories on a global basis. Any shock to the system now will cause higher, faster oil prices. We have waited long enough in our portfolios, with our currently large 38 percent energy weight. We think the rewards are just around the corner.

The other key event has been the rapid rise of interest rates in 2018. With rates going above the 2.63% in the ten-year bond and 30-year rates rising above 3% in the US, we see the long-term declining trend in rates that has been in place since the 1980's appears to have been broken. These higher rates have had a cascading effect on stock prices, but even more so on real estate and bonds. To this effect we have sold off almost all our real estate exposure that we have owned for years.

Basis of presentation and adoption of IFRS

The Fund's interim financial statements has been prepared in compliance with International Financial Reporting Standards (IFRS) as published by the International Accounting Standards Board ("IASB") applicable to the preparation of financial statements, including International Accounting Standards (IAS) 34, Interim Financial Reporting.

(1) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(2) Distributions were paid in cash/reinvested in additional units of the Fund, or both.

(3) The net assets presented in the financial statements differ from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in Note 2 of the notes to the financial statements.

(4) Fund Commenced operations on September 21, 2009

(5) 2009 figures have been restated to correct prior period error.

- (6) For financial years beginning on or after January 1, 2013, the financial highlights are derived from the Fund's financial statements prepared in accordance with International Financial Reporting Standards. The December 31, 2013 information has been restated for comparison purposes only. For financial years prior to 2013, the financial highlights were derived from the Fund's financial statements prepared in accordance with previous Canadian generally accepted accounting principles.

- (1) The information is provided as at June 30, 2018 and December 31 of the past five fiscal years, as applicable.
- (2) Management expense ratio is based on total expenses for the stated year and is expressed as an annualized percentage of daily average net assets during the year.
- (3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
- (4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.
- (5) 2009 figures have been restated for the purpose of computing the MER. Actual trading NAVs have not been restated.
- (6) The December 31 information is derived from the Fund's audited annual financial statements. The net assets presented in the financial statements may differ from the net asset value calculated for Fund pricing purposes. An explanation of these differences, if any, is disclosed in Note 2 of the notes to the financial statements.
- (7) For financial years beginning on or after January 1, 2013, the financial highlights are derived from the Fund's financial statements prepared in accordance with International Financial Reporting Standards. The December 31, 2013 information has been restated for comparison purposes only. For financial years prior to 2013, the financial highlights were derived from the Fund's financial statements prepared in accordance with previous Canadian generally accepted accounting principles.

Management Fees

In consideration of the services provided by Vertex One Asset Management Inc, the Fund pays Vertex One Asset Management Inc a management fee, monthly in arrears, and calculated daily, on each business day, as a percentage of the net asset value of each class of Units that comprise a Fund.

The management fee may vary from Class to Class and will be deducted as an expense of the Fund in the calculation of the net profits of such Fund. The management fee for each of the existing classes of Units is as follows:

Class B: 1/365 of 2% (2% per annum) of the net asset value of the Class B Units on the preceding business day plus applicable taxes.

Class F: 1/365 of 1% (1% per annum) of the net asset value of the Class F Units on the preceding business day plus applicable taxes.

The Fund received services in consideration of the management fees as follows:

Services Provided	Class B	Class F
Distribution related costs	62.5%	0%
Portfolio Advisor and Management Services	37.50%	100%

Performance Fees

The Fund will pay to Vertex One a performance fee, plus applicable taxes, in relation to each class of Units that is equal to 20% of the amount by which the total return of the class of Units exceeds the total percentage increase or decrease of the following benchmarks having the following components, for the period since the performance fee was last paid.

- 50% weighting – S&P 500 Total Return Index (or its successor indices, as applicable)
- 50% weighting – S&P/TSX Composite Total Return Index (or its successor indices, as applicable)

If at any time the performance of a Fund is less than its benchmark, then no performance fee will be payable until the performance of the Fund relative to its benchmark has exceeded the amount of the deficiency.

PAST PERFORMANCE

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

The following chart shows the performance of the Fund since its commencement of operations on September 21, 2009 to June 30, 2018. The charts show you the Fund’s annual historical return and how it changes each year. Annual return is the percentage change in the value of an investment

from January 1 to December 31, unless otherwise noted. The charts show, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year. The returns are cumulative and include all distributions.

*2009 returns are since the commencement of operations on September 21, 2009. Also refer to footnote (6) under “The Fund’s Net Assets per Unit” Section
